

MICODE

Enterprise systems. AI inside.

2024

MiCode is a software company in Gdańsk, founded in 2024 by an engineer with 18+ years of IT experience.

mi-code.pl

WHY US

Most AI consultants never kept an AI system running

We run six products of our own — so we answer
from experience, not theory.

WHAT WE SHIP

Six products of our own

Four have public repositories. One is on npm. Three have their own production sites.

<u>AI Budget Assistant</u>	<u>Google Play</u>
<u>Accounting AI Agent</u>	<u>SaaS + GitHub</u>
<u>Legalka KB</u>	<u>Telegram bot</u>
<u>Marketing AI assistant</u>	<u>SaaS + GitHub</u>
<u>ngx-open-web-ui-chat</u>	<u>open source, npm</u>
<u>Testing AI Assistant</u>	<u>test orchestration</u>

WHAT WE SELL

Three lines, deliberately narrow

AI is not a fourth line — it goes inside the system we are already building for you.

Custom software	Java, Angular
Systems integration	REST API
Cloud	migration, tuning

HOW WE START

Five steps to kickoff

The intro call is free, and a written quote follows within three business days.

Intro call	free
Proposal	three business days
Development	iterative, with demos
Delivery	a working system
Support	we stay with it

MICODE

Let's start the conversation

A free intro call and a written quote within three business days — no commitment before we know your project.
